Asan Medical Center: Professor, Cancer and Trial Imaging, 2013 – Present

<Research areas>

My main research topics are focused on the imaging for drug development. I work for Center for bioimaging of new drug development (C-BiND) which is a center to utilize preclinical imaging for drug development. I also work for Asan Image Metrics (AIM) which is a central imaging core lab to utilize clinical imaging for clinical trial.

The ongoing research of CT/MR imaging for drug development includes development of new response criteria, functional imaging, standardization of image acquisition and analysis.
