Mar. 1989 - Feb. 1990, Internship in the SNUH, Seoul, Korea

National University College of Medicine)
Mar. 1990 - Feb. 1994, Residency in the Department of Urology, SNUH, Seoul, Korea

Research Laboratory in the Department of Physiology, Seoul

Korean Cancer Association

Aug 2016-present, General Director, Medical Device Innovation Center, Biomedical Research Institute, SNUH

Apr 2013-present, Head, Medical Device Clinical Trials Center, Biomedical Research Institute, SNUH

Oct 10, 2016- Sep 1, 2017, President, Pan-pacific Continence Society Jan. 2016- Dec 2017, President, Korean Continence Society

Over the past 25 years, Professor Oh has authored or coauthored over 220 peer-reviewed papers and contributed to 15 book chapters, including a chapter in the ninth edition of Campbell's Urology textbook as the first author. He was also featured as the principal investigator in 103 different researches on the lower urinary tract dysfunction areas. His primary interest is in benign prostatic hyperplasia (BPH), overactive bladder, and neuropathic lower urinary tract dysfunction. He is interested in research on the urodynamic aspect of bladder outflow obstruction associated with BPH and also in the Holmium laser enucleation of the prostate or HoLEP for BPH. In addition to his medical specialty, Professor Oh holds medical device-related positions: he is the General Director of the Medical Device Innovation Center and also Director of the Medical Device Usability Testing Center of SNUH.

Professor Oh is an active member of several professional organizations, including the International Continence Society, American Urological Association, and Society of Urodynamics, Female Pelvic Medicine and Urogenital Reconstruction. He had been served as the President of the Korean Continence Society since January 2016 and served as the President of the Pan-Pacific Continence Society.
